

Lung Cancer Patient Education and Engagement in Care Decisions: Resource Compendium¹⁻⁷

Considering patient preferences, goals, and values is of increasing importance in lung cancer because the complexity of the treatment landscape is growing, resulting in more options and the need for more individualized approaches to treatment selection, and planning that, in addition to considering the evidence and best practice recommendations, should take into account the needs and preferences of patients with lung cancer and their caregivers

Shared decision-making (SDM)—a process of two-way communication during which clinicians and patients work together to make treatment and other care-related decisions—has been found to provide many important benefits to patients, clinicians, healthcare systems, and society as a whole

Providers share key disease state and treatment-related information

Patients communicate values, risk attitudes, and treatment goals

High quality information and resources are essential in supporting shared decision-making in lung cancer!

go2foundation.org

Transforming survivorship as the world's leading organization dedicated to saving, extending, and improving the lives of those vulnerable, at risk, and diagnosed with lung cancer

Patient & Support Services

Patient-focused, accessible, free programs are the foundation of GO₂ resources that educate, support, empower, and provide hope to all those living with lung cancer

- HelpLine: personalized navigation
- Online support communities
- Phone Buddies: peer-to-peer support
- LungMATCH: treatment and trial navigation

- Lung Cancer Living Room™
- “Bringing Hope Home”
- Lung Cancer Support Group Network
- Educational materials: patient-/caregiver-friendly handbooks and brochures

- ◆ *Understanding Your Diagnosis*
- ◆ *Understanding Non-Small Cell Lung Cancer*
- ◆ *Understanding Small Cell Lung Cancer*
- ◆ *Understanding Lung Cancer Biopsies*
- ◆ *Biomarker Testing*
- ◆ *Understanding Your Lung Cancer Pathology Report*
- ◆ *Immunotherapy for Lung Cancer*
- ◆ *Understanding Lung Cancer Clinical Trials*
- ◆ *Playing a Critical Role: Lung Cancer Caregiver*

Access the activity, “Chair’s Take: Everything You Need to Know About Biomarkers, Immunotherapies, Combinations, and Other Emerging Approaches for Lung Cancer,” at [PeerView.com/WCZ40](https://www.peerview.com/WCZ40)

Building Community & Making an Impact

Annual National Advocacy Summit, awareness raising, and events bring people together to improve lung cancer at all levels

- Ambassador Program
- Shine A Light Awareness Events
- Patient Advocacy Summit in D.C.
- National Event Series/Grassroots Events (walks and runs)

National Ambassador Council

**IT'S TIME
TO SHINE**

Lung Cancer Registry

www.lungcancerregistry.org

- Patient and caregiver reported data
- ~2,000 participants
- Diagnosis, treatment, and quality of life data
- Quarterly, IRB-approved longitudinal surveys
- Partnership with the American Lung Association and International Association for the Study of Lung Cancer (IASLC)
